

RESEARCH AND EDUCATION WORKING GROUP

October 27, 2022 / 9:15 – 10:45 a.m.

Minneapolis, MN

Meeting Agenda

The work of the Research and Education Working Group has over the past number of years been subsumed into the G-PST Research and Education activities. While the two are complementary, ESIG and G-PST are distinct.

The agenda for this WG meeting is designed around establishing a distinct ESIG research and education activity that leverages the G-PST activity and addresses ESIG needs.

1. Introductions
2. The G-PST Research and Education activities - designed so as those not familiar with G-PST can see how it fits with ESIG
3. Open discussion on ESIG needs
 - a) ESIG is not a large organization and doing research at any scale is not in our scope. How can ESIG influence and help direct and benefit from the research of other entities e.g. DOE, National Labs, Universities, etc.
 - b) What should our relationship be with the research community? e.g. EPRI, Labs, Universities
 - c) University membership of ESIG is sparse and possibly indicative of a shortcoming in our research and education activities - how can we address this?
 - d) While ESIG Tutorials are on a case-by-case basis - should ESIG through the University sector try and ensure that the curriculum is appropriate and should we on a case-by-case basis provide volunteers to give guest classes?, etc.
4. Actions to be taken - being cognizant of our sparse resources
5. Conclusions and next steps
