

SUSTAINING MEMBERSHIP PROGRAM

Sustaining members are those who contribute to the Energy Systems Integration Group (ESIG) over and above the level of their normal annual dues. The support of sustaining members dramatically increases our ability to provide the training, materials, and briefing documents for decisionmakers that come from what we collaboratively figure out together at ESIG. The work taking place within our task forces and working groups is critical to the issues of tomorrow, including rethinking resource adequacy, transmission planning, grid-forming inverters, market participation of emerging and distributed resources, system flexibility, hybrid resources, and the pathways for decarbonization.

Sustaining members are recognized in all we do and, most importantly, demonstrate their commitment to the ESIG mission of grid transformation and energy systems integration—catalyzing the planning and operation of future energy systems that are reliable, economic and sustainable.

Please thoughtfully consider the benefits to society, your stakeholders and your organization by participating as an ESIG Sustaining Member.

	BRONZE (\$20,000)	SILVER (\$50,000)	GOLD (\$200,000)	PLATINUM (\$400,000+)
Logo placement on ESIG website & electronic mailings	•	•	•	•
